EXAMINER'S AMENDMENT

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
 - I. Claims 1-39, drawn to a strobe algorithm in class 715, subclass 836.
 - II. Claims 40-44, drawn to a document navigation and bookmarking device in class 715, subclass 517.

Inventions of a strobing algorithmic display and document navigation and bookmarking are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I does not include the bookmarking elements of Group II. The subcombination has separate utility such as document navigation purposes not addressing the functionality of the strobing algorithm.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Claims 40-44 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse, along with cancellation of the claims 40-44 via a phone conversation with Sheldon Parker on 3/8/05.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sheldon Parker on 3/16/05.

The application has been amended as follows:

Claim 1, line 7: replace "presentation." with "presentation, and wherein said gap is determined by the following formula: $G=S-(S/x)$, given that $D+G=S$, wherein D =duration, G =gap, S =speed, and x =a number in the range of 1.0-2.0."

Cancel claim 3.

Claim 4, line 1: replace "The method of claim 3" with "The method of claim 1"

Claim 5, line 1: replace "The method of claim 3" with "The method of claim 1"

Claim 6, line 1: replace "The method of claim 3" with "The method of claim 1"

Claim 7, line 1: replace "The method of claim 3" with "The method of claim 1"

Claim 22, line 1: replace "presentation." with "presentation, and wherein said gap is determined by the following formula: $G=S-(S/x)$, given that $D+G=S$, wherein D =duration, G =gap, S =speed, and x =a number in the range of 1.0-2.0."

Cancel claims 40-44.

Allowable Subject Matter

Claims 1, 2 and 4-39, now renumbered 1-38 are allowed.

The following is an examiner's statement of reasons for allowance: Although the cited art does suggest changing display speed for strobing text, it does not teach or suggest a changing the length of the gap when the speed is changed relative to the duration the text is displayed, determined by the specific formula as recited, nor has that feature been found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sara M Hanne whose telephone number is (571) 272-4135. The examiner can normally be reached on M-F 7:30am-4:00pm, off on alternating Fridays.
